## CURVED BEAUTY

Becoming one with the landscape

Beautifully curved into an embankment, this stunning swimming pool is an excellent example of the work carried out by the award-winning KMD The Outdoor Construction Company owned by Kieran Devlin.

From construction to the renovation of existing pools, Kieran and his dedicated team can tackle any swimming pool or landscape project with ease, even the more challenging ones, such as the featured pool.

Built into the side of a steep, sloping property, this project was a challenge. From access to the site through to completion of the build, each step had to be carefully planned to ensure a high-quality finish.

Retaining walls were designed to level the area for the pool, which was curved to match the shape of the sandstone wall. An infinity edge adds a contemporary touch and is fully tiled in glass mosaics by Trend Tile.

Timber decking was added to the design to create an extra area for the family to enjoy.

KMD The Outdoor Construction Company places an emphasis on high-quality result and exceeding clients' expectations with every project. Offering a full range of construction services for your outdoor space, KMD The Outdoor Construction Company can create a dream entertaining package specifically to suit each client.
