KMD The Outdoor Construction Company was started by Kieran Devlin 14 years ago. The company works on an average of five to eight pools each year, based mainly in Sydney. KMD specialises in tight-access jobs. "The kind of jobs that no one else wants to do," says Kieran. The company places an emphasis on a high-quality result and exceeding clients' expectations with every project. Offering a full range of construction services for your outdoor space, KMD The Outdoor Construction Company can create a dream entertaining package specifically to suit each client.

## Inner-city entertainer

*This tight space encapsulates all aspects of modern outdoor living*

### Specialising in tight-access jobs, KMD

The Outdoor Construction Company made the impossible possible when seamlessly fitting a chic pool into this small urban yard. The pool is not only a fantastic place to swim; it also functions as a great feature piece aided by the use of trendy glass mosaics.

The bluestone rebated coping works wonderfully with the 130mm ironbark decking to create a smooth transition from inside to outside. The wet-edge creates a harmonious feel, making everything flow together.

The clients wanted the ultimate inner-city entertaining yard, which is exactly what KMD gave them. It's a place where family and friends can drop around for a swim and enjoy a barbecue on a lazy summer day while the Hunza garden lights featured around the yard mean this restful retreat can double as a great place to have dinner and drinks.

KMD went above and beyond to achieve their clients' goals with the construction of this appealing pool, which was designed by Paul Scrivener.
